

MOBILE ENGINEER (M/W/D)

We are looking for a mobile engineer with emphasis on the **development of multiplatform applications** to support our team!

Liftric GmbH is an independent spin-off of Immundiagnostik AG and acts as an incubator for new ideas around the future of diagnostics. We are living a start-up culture and therefore your tasks and responsibilities will be accordingly flexible. We have some primary fields of activity for which we need a motivated developer, but in addition to that, involvement in other areas is highly desirable. If you want to, you can quickly take on a lot of responsibility.

We are working on an holistic platform to enable rapid test manufacturers all around the globe to make the next step in digitalising their products. We are raising the bar in how people can use diagnostics and develop patient empowering systems to collect, process, display and distribute health records. You will be working on leveraging those systems and bring the future of diagnostics to life.

YOU CAN ALSO GET A LITTLE INSIGHT INTO WHAT WE DO ON MEDIUM

<https://medium.com/immundiagnostik/immundiagnostik-who-we-are-7fbe55044fdf>

YOUR RESPONSIBILITIES

- Maintain and enhance the existing mobile landscape
- Creation of new Apps from scratch and with our existing modules
- Evaluate fit of product features to customer needs
- Collaborate with your fellow developers to further enable our success
- Deliver scalable, testable, maintainable, and high-quality code

YOUR QUALIFICATIONS

- At least 2+ years of experience in programming apps for Android and/or iOS
- Good knowledge of Kotlin and/or Swift
- Not fixed on a platform – it is not necessary to already have experience with both platforms but there should be no fear of contact
- Care about software architecture across the front-end, back-end, and the APIs that glue them
- Passionate about code quality, continuous delivery, automated testing
- Always driven to enhance our applications beyond the status-quo
- You value team success over personal success
- Aesthetic sensitivity for UIs
- Meticulous & autonomous work ethic
- High degree of personal responsibility for the assigned tasks
- Open-Minded: we want to go down new paths and preferably with you

WHAT AWAITS YOU

- You're highly encouraged to learn about new technologies and expand your knowledge.
- An open door for feedback at all times!
- A green office
- Delicious coffee and soft drinks
- Flexible working hours & home office possibility (but we're not remote-first)
- 30 days vacation
- Subsidised public transport ticket
